

# Challenge

## **Develop a Web Page Using HTML5**

# Challenge

- Profile Page

## Profile Page

Create a profile page using the HTML5 elements like heading, paragraph, anchor, lists and br.

The boilerplate contains the intended sample output as an image file. [Click here](#) for the image.

Note: Tasks to complete this practice are given in the upcoming slide.

## CHALLENGE

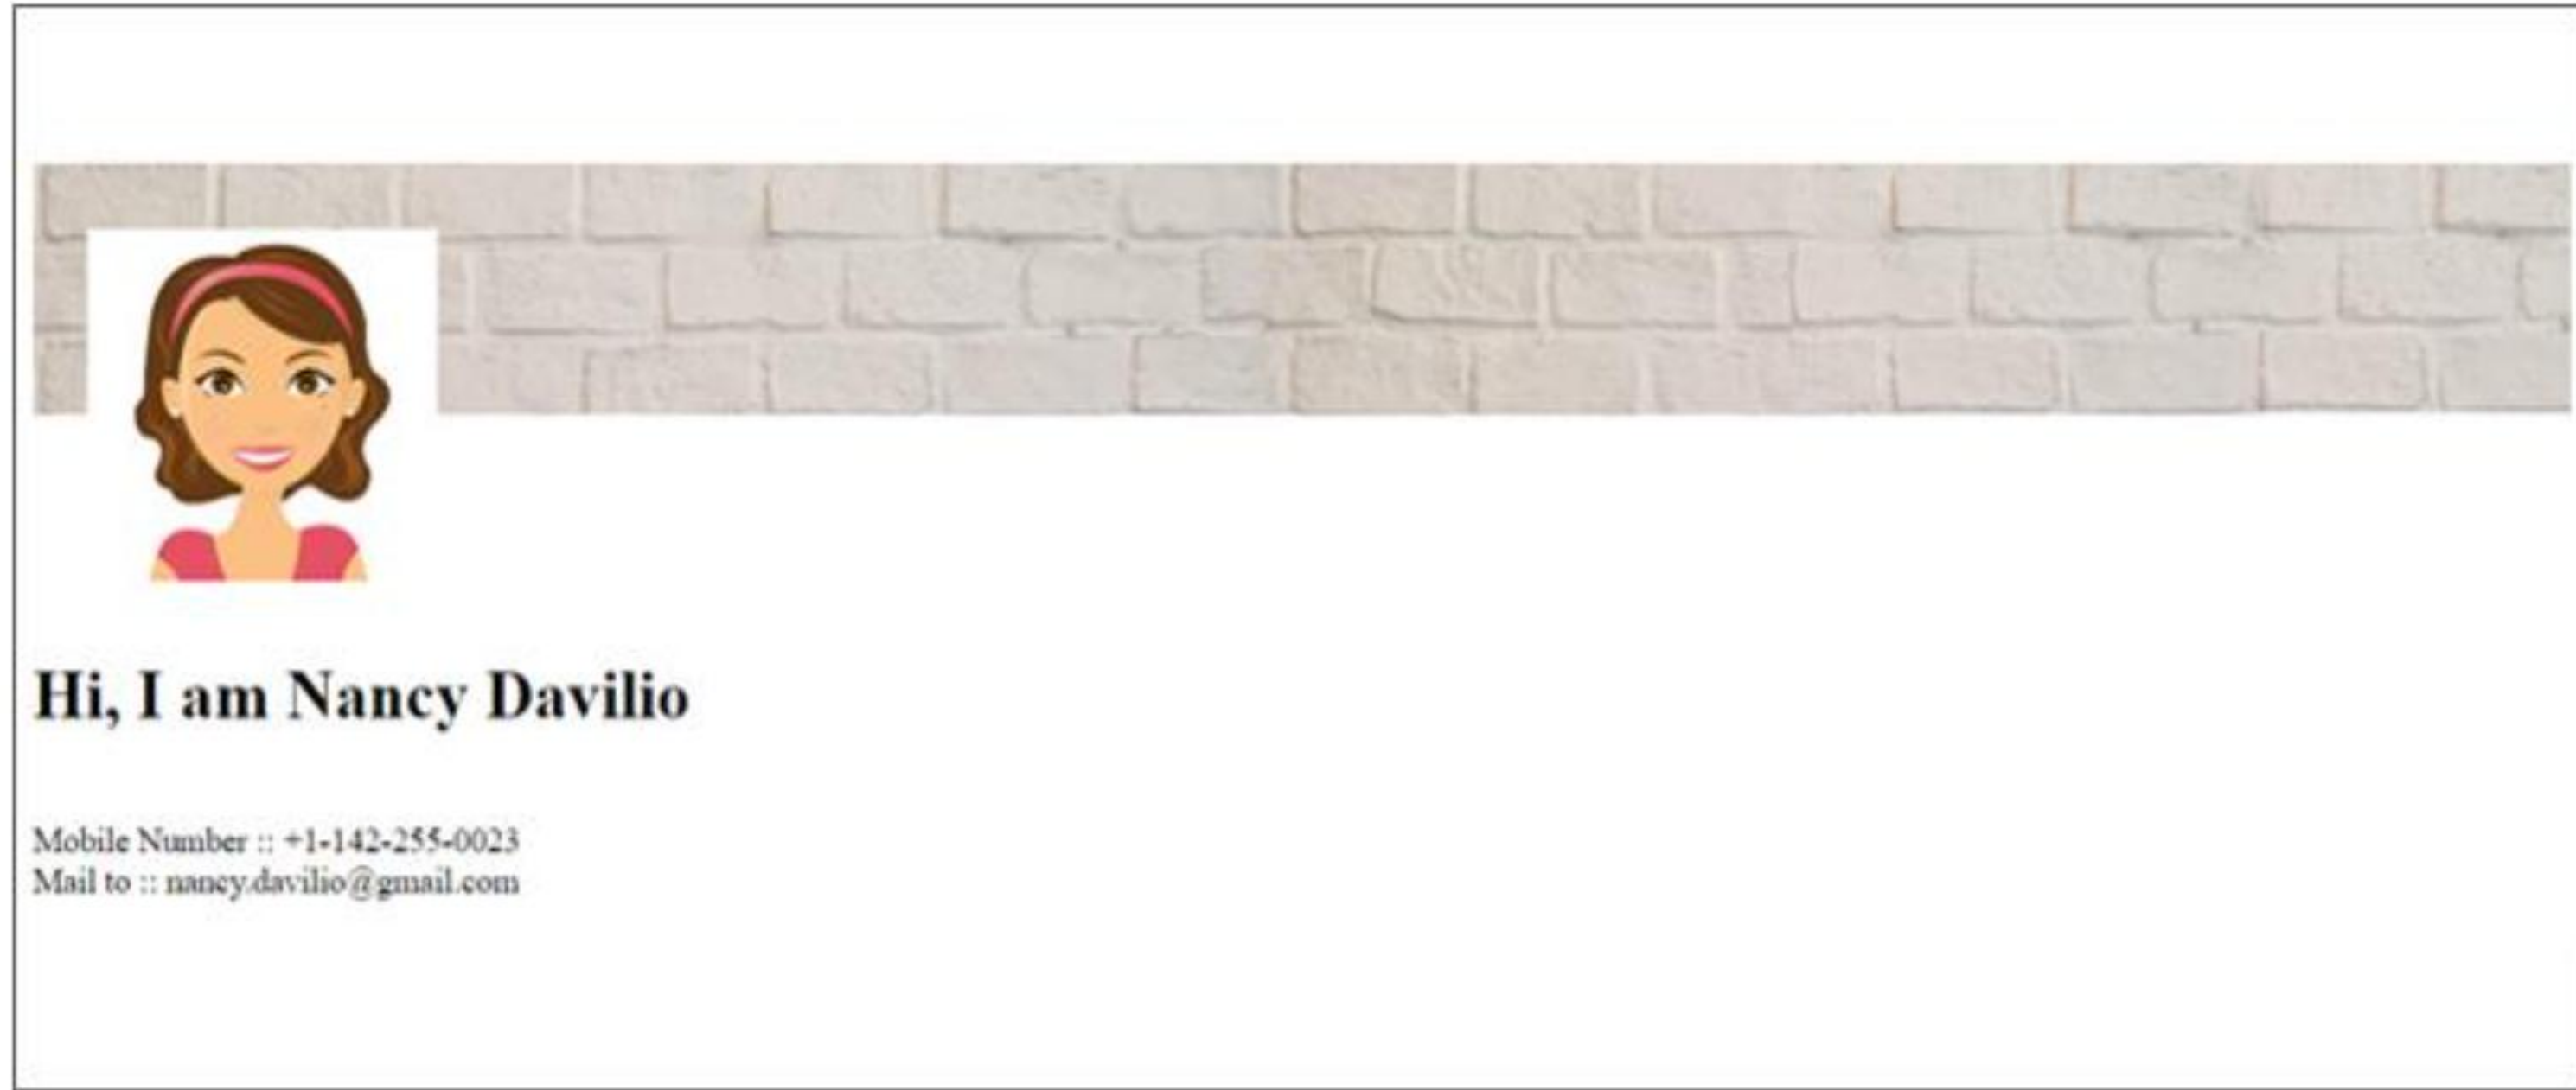

# Tasks

- The solution for this challenge should be written in the file **index.html** located inside the boilerplate code.
- The solution can be developed in 4 steps:
  - Step 1: Create Heading
  - Step 2: Create About Me section
  - Step 3: Create Work Experience section
  - Step 4: Create Testimonial section
- Edit **index.html** file provided in the boilerplate to add various HTML elements to get the page output as shown in the image.
- Use appropriate tags to accomplish this outcome based on the practices performed earlier.
- Texts used in the web page are available in the README.md file of the boilerplate.

# Step 1 - Heading: Expected Page Output

- Use image, heading (h1), paragraph and br elements to generate this output.

# Step 2 - About Me: Expected Page Output

## **I am a freelance UI Developer**

I have 5+ years of experience in creating Web User Interfaces for various projects and have received a great appreciation from my clients

I expertise in following web technologies

- HTML5
- CSS3
- JavaScript
- Angular

Apart from creating awesome web designs, in my free time, I love to watch good movies, listen to music or visit beach side with my friends

- Use heading (h3), paragraph, and unordered list elements to generate this output.

# Step 3 - Work Experience: Expected Page Output

## Work Experience

Below is the summary of my recently completed projects:

### [design-space.com](#) - Home and Office Interior Design

Lorem ipsum, dolor sit amet consectetur adipisicing elit. Quia deleniti labore reiciendis! Temporibus, amet rem ad ipsam nulla odit, quaerat dicta repellendus, minus veniam laborum libero est officiis molestiae dolorem.

### [lets-play.com](#) - Online Gaming Site

Lorem ipsum dolor sit amet consectetur adipisicing elit. Ullam exercitationem expedita sint quidem maxime porro ipsam facilis quia aliquid dolor perferendis laudantium in cupiditate laborum explicabo, consequatur quibusdam. Rerum, nostrum.

### [wander-thirst.com](#) - Online Travel Planning WebSite

Lorem ipsum, dolor sit amet consectetur adipisicing elit. Quia deleniti labore reiciendis! Temporibus, amet rem ad ipsam nulla odit, quaerat dicta repellendus, minus veniam laborum libero est officiis molestiae dolorem.

### [pin2piano.com](#) - Online Shopping Site

Lorem ipsum dolor sit amet consectetur adipisicing elit. Ullam exercitationem expedita sint quidem maxime porro ipsam facilis quia aliquid dolor perferendis laudantium in cupiditate laborum explicabo, consequatur quibusdam. Rerum, nostrum.

- Use heading (h3), paragraph, definition list and anchor elements to generate this output.

# Step 4 - Testimonials: Expected Page Output

## Testimonials
